

QMT-50 - PLAN OVERVIEW

This plan consists of a basic outline to guide you in preparation for your upcoming trail event. You may adapt it according to your current abilities, experience, specific needs and reality. Don't forget progression and being constant are key, as well as is respecting the zones indicated in this plan. Trail outings, versus road outings, will be integrated to the plan as weeks go by. Outings are planned in terms of time and consider the average time to complete the chosen event. You may need to adjust the duration of your outing depending on your abilities and personal estimated time to complete the course. If you feel you need more personalized planning, tips or follow-ups to your training, Tout.Trail coaches can help you with that.

Naming convention :

- Zones (V1 to V5) : Polarized training is a way of organizing a training plan in which most of the training stress occurs at low or high intensity, in zones 1 and 2, coupled with intensity blocks. What each training zone represent are explained at the following page.
- Cross-training and rest days : These days are strategically planned to balance training stress with recovery time. Don't forget resting is a part of training. Cross-training can also be applied to limit impacts on the body while staying active.
- Shock weekends (WEC): A "shock weekend" in trail running is a period of two to three days during which an athlete significantly intensifies their running training. The duration of outings is limited to allow better recovery and avoid over-fatigue. These outings should be done consecutively and in the suggested order, wherever possible.

QMT- 50 - PLAN OVERVIEW

Training zones

Speed	% MAS	Breathing Capacity	Perceived Effort Level
V1	50-70%	Easy	1-3/10
V2	70-78%	Hard to speak a full sentence	3-5/10
V3	78-76%	Hard to speak 3 consecutive words	5-6/10
V4	86-94%	Hard to talk	7-8/10
V5	94-102%	Impossible to talk	9-10/10

Notes

Spring training can be tough. Respect the trails an opt for dirt roads if conditions aren't conducive to trail running.

Training goals

Breathe through your nose and aim for 3000 to 4000m of positive altitude gain in April.

Keep up your weight training.

Notes

Think about gearing your training more specifically to the terrain in which you'll be running at QMT: rocks, roots and positive gradient.

Training goals

First WEC planned! Have fun and start testing your equipment and nutrition!

Aim for 5,000 to 6,000m of positive altitude gain in May. Reduce weight training if necessary. Test nutrition during the WEC and during longer outings.

JUNE 2025

Notes

Start getting used to running at the time your race will start (in the AM for the QMT-50). This will allow your body to get accustomed to the schedule, especially if you tend to run more often in the afternoon or evening.

Training goals

Aim for 6000 to 8000m of positive altitude gain in June.

Continue testing equipment and nutrition.

Optimize sleep and recovery through stretching exercises.

Notes

Time for visualization. Picture yourself smiling at the start and then, with the same smile at the finish line.

Training goals

Focus on sleep, nutrition and recovery leading up to the race. Take in all the efforts you've made.

Enjoy your race, be proud of yourself and give it your all.
